dataframe Documentation

Release 0.1

Simon Dirmeier

August 09, 2016

CONTENTS

1 Requirements 3

2 Contents 5

´´dataframe´´ is a Python libary for efficient computations for data in table-format, just like mySQL. I will step by step (i.e. version after version) include new functionalities to the ´´dataframe´´ package.Right now only grouping, modifying, aggegating and subsetting is supported. Sooner or later the library will be extended to C++.

CHAPTER

ONE

REQUIREMENTS

- Python 3
- scipy 0.18.0
- numpy 1.12.0
- nose 1.3.7
- sphinx 1.3.3

CHAPTER

TWO
